

ANALOGUE MEASURING INSTRUMENTS

FAD - Double Pointer frequency meter

FAD

- Sistema de hierro movil con convertidor electrónico
- Para corriente alterna 50 - 60 Hz

Description

The instruments have 2 independent moving coil movements to measure the frequency for example between 2 generators or one generator and the net. These instruments are made of a moving coil movement with electronic transducer. The meter movements are jewelled and shock-proofed by sprung storage of jewels.

The indication is mainly independent of curves, form errors and fluctuations of the measuring voltage.

Admissible change in rating voltage: $\pm 20 \%$

External magnet field: 0.5 mT
