TNM230 - Energy meter and Electrical powermeter

- Simple installation - DIN Rail mounted

TNM230 energy powermeter is a compact, multi functional, multi channel, three\single-phase powermeter, especially designed to meet the stringent needs of power and energy measurement in any electrical installation up to 8 sets three phase channels or up to 24 single phase engery meters

TNM230 includes history data logging up to 6 months and supports standard communication protocols BACnet and Modbus with simple integration into building management systems over RS485 or Ethernet TCP.

An indispensable tool for the building engineer, it aids efficient use of electricity by showing power factor, max. and min demand an current in neutral line.
